Mujahid Vhora

Full-Stack Developer | Node.js | Next.js | TypeScript | AI Systems

Ahmedabad, Gujarat, India | vhoramujahid007@gmail.com | linkedin.com/in/mujahid007

Professional Summary

Full-Stack Developer with 6 months of production experience building modern web applications and AI-powered systems. Delivers scalable web products with Node.js, Next.js, and TypeScript, emphasizing polished, intuitive interfaces. Owns features from the data layer to the user interface. Bachelor of Computer Application graduate from LJ University with 5 professional certifications spanning cloud architecture, relational databases, C, HTML5, and full-stack development with Laravel & PHP.

Technical Skills

Languages: TypeScript, SQL, C, PHP, HTML5

Frameworks & Libraries: Node.js, Next.js, React, Tailwind CSS, Laravel

Backend & APIs: REST APIs, AI Integrations, Authentication

Databases: PostgreSQL, SQL, Relational Databases (RDBMS)

Security: Web Security, Multi-factor Authentication, Input Validation, Secure Coding

Cloud: AWS (Cloud Architecting)

Professional Experience

pelquant Ahmedabad, Gujarat, India

Full-Stack & AI Systems Engineer *January 2026 – June 2026 (6 months)*

- Engineered full-stack web applications over 6 months using 3 core technologies: Node.js, Next.js, and TypeScript.
- Developed REST APIs on relational databases to support scalable product features across 2 layers: data and API.
- Shipped AI-powered features and backend systems into production applications within a 6-month tenure.
- Handled 3 application layers: data modeling, API development, and front-end polish.
- Delivered scalable web products across 2 roles, pairing clean UI design with smooth user experiences.
- Crafted responsive, user-friendly interfaces balancing 2 priorities: performance and UX.
- Applied 3 secure coding practices: input validation, authentication, and safe API design.
- Designed applications to be safe by default, guided by awareness of the 10 most critical web security risks.
- Partnered with the team across 3 workflows: feature planning, code reviews, and deployments.

Full Stack Developer *January 2026 (1 month)*

Projects

Daily Mood Tracker daily-mood-tracker-omega.vercel.app

Next.js, PostgreSQL *Full-Stack Web Application*

- Created a full-stack web application on a 2-part stack: a Next.js front end and a PostgreSQL database.
- Implemented user authentication to secure access to the application.
- Developed an admin dashboard for administrative oversight of the application.
- Launched 1 live application to a public production URL on Vercel.
- Delivered a complete product end to end across 4 components: user interface, authentication, database, and admin tooling.

Education

LJ University August 2023 – May 2025

Bachelor of Computer Application (BCA)

Certifications (5)

AWS Academy Graduate – Cloud Architecting (Training Badge) | Introduction to Relational Databases (RDBMS) | C for Everyone, Part 1: Programming Fundamentals | Introduction to HTML5 | Master Full-Stack Web Development with Laravel & PHP
